Notice
While reasonable efforts have been made to ensure that the information in this document is complete and accurate at the time of printing, Avaya assumes no liability for any errors. Avaya reserves the right to make changes and corrections to the information in this document without the obligation to notify any person or organization of such changes.

Documentation disclaimer
"Documentation" means information published by Avaya in varying mediums which may include product information, operating instructions and performance specifications that Avaya generally makes available to users of its products. Documentation does not include marketing materials. Avaya shall not be responsible for any modifications, additions, or deletions to the original published version of documentation unless such modifications, additions, or deletions were performed by Avaya. End User agrees to indemnify and hold harmless Avaya, Avaya's agents, servants and employees against all claims, lawsuits, demands and judgments arising out of, or in connection with, subsequent modifications, additions or deletions to this documentation, to the extent made by End User.

Link disclaimer
Avaya is not responsible for the contents or reliability of any linked websites referenced within this site or documentation provided by Avaya. Avaya is not responsible for the accuracy of any information, statement or content provided on these sites and does not necessarily endorse the products, services, or information described or offered within them. Avaya does not guarantee that these links will work all the time and has no control over the availability of the linked pages.

Warranty
Avaya provides a limited warranty on its hardware and Software ("Product(s)"). Refer to your sales agreement to establish the terms of the limited warranty. In addition, Avaya’s standard warranty language, as well as information regarding support for this Product while under warranty is available to Avaya customers and other parties through the Avaya Support website:
http://support.avaya.com
Please note that if you acquired the Product(s) from an authorized Avaya reseller outside of the United States and Canada, the warranty is provided to you by said Avaya reseller and not by Avaya. "Software" means computer programs in object code, provided by Avaya or an Avaya Channel Partner, whether as stand-alone products or pre-installed on hardware products, and any upgrades, updates, bug fixes, or modified versions thereo.

Licenses
THE SOFTWARE LICENSE TERMS AVAILABLE ON THE AVAYA WEBSITE, HTTP://SUPPORT.AVAYA.COM/LICENSEINFO ARE APPLICABLE TO ANYONE WHO DOWNLOADS, USES AND/OR INSTALLS AVAYA SOFTWARE, PURCHASED FROM AVAYA INC., ANY AVAYA AFFILIATE, OR AN AUTHORIZED AVAYA RESELLER (AS APPLICABLE) UNDER A COMMERCIAL AGREEMENT WITH AVAYA OR AN AUTHORIZED AVAYA RESELLER. UNLESS OTHERWISE AGREED TO BY AVAYA IN WRITING, AVAYA DOES NOT EXTEND THIS LICENSE IF THE SOFTWARE WAS OBTAINED FROM ANYONE OTHER THAN AVAYA, AN AVAYA AFFILIATE OR AN AVAYA AUTHORIZED RESELLER; AVAYA RESERVES THE RIGHT TO TAKE LEGAL ACTION AGAINST YOU AND ANYONE ELSE USING OR SELLING THE SOFTWARE WITHOUT A LICENSE. BY INSTALLING, DOWNLOADING OR USING THE SOFTWARE, OR AUTHORIZING OTHERS TO DO SO, YOU, ON BEHALF OF YOURSELF AND THE ENTITY FOR WHOM YOU ARE INSTALLING, DOWNLOADING OR USING THE SOFTWARE (HEREINAFTER REFERRED TO INTERCHANGEABLY AS "YOU" AND "END USER"), AGREE TO THESE TERMS AND CONDITIONS AND CREATE A BINDING CONTRACT BETWEEN YOU AND AVAYA INC. OR THE APPLICABLE AVAYA AFFILIATE ("AVAYA").

Heritage Nortel Software
"Heritage Nortel Software" means the software that was acquired by Avaya as part of its purchase of the Nortel Enterprise Solutions Business in December 2009. The Heritage Nortel Software currently available for license from Avaya is the software contained within the list of Heritage Nortel Products located at http://support.avaya.com/licenseinfo under the link “Heritage Nortel Products”. For Heritage Nortel Software, Avaya grants Customer a license to use Heritage Nortel Software provided hereunder solely to the extent of the authorized activation or authorized usage level, solely for the purpose specified in the Documentation, and solely as embedded in, for execution on, or (in the event the applicable Documentation permits installation on non-Avaya equipment) for communication with Avaya equipment. Charges for Heritage Nortel Software may be based on extent of activation or use authorized as specified in an order or invoice.

Copyright
Except where expressly stated otherwise, no use should be made of materials on this site, the Documentation, Software, or hardware provided by Avaya. All content on this site, the documentation and the Product provided by Avaya including the selection, arrangement and design of the content is owned either by Avaya or its licensors and is protected by copyright and other intellectual property laws including the sui generis rights relating to the protection of databases. You may not modify, copy, reproduce, republish, upload, post, transmit or
distribute in any way any content, in whole or in part, including any code and software unless expressly authorized by Avaya. Unauthorized reproduction, transmission, dissemination, storage, and or use without the express written consent of Avaya can be a criminal, as well as a civil offense under the applicable law.

Third-party components
“Third Party Components” mean certain software programs or portions thereof included in the Software that may contain software (including open source software) distributed under third party agreements (“Third Party Components”), which contain terms regarding the rights to use certain portions of the Software (“Third Party Terms”). Information regarding distributed Linux OS source code (for those Products that have distributed Linux OS source code) and identifying the copyright holders of the Third Party Components and the Third Party Terms that apply is available in the Documentation or on Avaya’s website at: http://support.avaya.com/Copyright. You agree to the Third Party Terms for any such Third Party Components.

Note to Service Provider
The Product may use Third Party Components that have Third Party Terms that do not allow hosting and may need to be independently licensed for such purpose.

Preventing Toll Fraud
“Toll Fraud” is the unauthorized use of your telecommunications system by an unauthorized party (for example, a person who is not a corporate employee, agent, subcontractor, or is not working on your company's behalf). Be aware that there can be a risk of Toll Fraud associated with your system and that, if Toll Fraud occurs, it can result in substantial additional charges for your telecommunications services.

Avaya Toll Fraud intervention
If you suspect that you are being victimized by Toll Fraud and you need technical assistance or support, call Technical Service Center Toll Fraud Intervention Hotline at +1-800-643-2353 for the United States and Canada. For additional support telephone numbers, see the Avaya Support website: http://support.avaya.com. Suspected security vulnerabilities with Avaya products should be reported to Avaya by sending mail to: securityalerts@avaya.com.

Trademarks
The trademarks, logos and service marks (“Marks”) displayed in this site, the Documentation and Product(s) provided by Avaya are the registered or unregistered Marks of Avaya, its affiliates, or other third parties. Users are not permitted to use such Marks without prior written consent from Avaya or such third party which may own the Mark. Nothing contained in this site, the Documentation and Product(s) should be construed as granting, by implication, estoppel, or otherwise, any license or right in and to the Marks without the express written permission of Avaya or the applicable third party.

Avaya is a registered trademark of Avaya Inc.
All non-Avaya trademarks are the property of their respective owners, and “Linux” is a registered trademark of Linus Torvalds.

**Note 1a:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

**Note 1b:** The user should not make changes or modifications not expressly approved by Avaya. Any such changes could void the user’s authority to operate the equipment.

**Note 2:**

**VCCI:**

This is a Class B product based on the standard of the Voluntary Control Council for Interference from Information Technology Equipment (VCCI). If this is used near a radio or television receiver in a domestic environment, it may cause radio
interference. Install and use the equipment according to the instruction manual.

http://www.avaya.com/jp
About the Avaya 2033 IP Conference Phone

The Avaya 2033 IP Conference Phone brings voice to the audio conference environment by connecting directly to a Local Area Network (LAN) through an Ethernet connection.

**Note 1:** Not all features are available on all telephones. Consult your system administrator to verify which features are available for your use.

**Note 2:** On the Avaya 2033 IP Conference Phone, the soft key labels display directly above the soft key.

**Basic features**

The Avaya 2033 IP Conference Phone supports the following features:

- three soft keys that, when required, map to 4 soft keys to provide access to a maximum of 10 functions
- multi-field LCD screen
- up to two extension microphones to provide microphone coverage in larger rooms
- volume control bar for adjusting ringer and speaker volume
- two specialized fixed keys:
  - Services
  - Message (Inbox)
- three call-processing fixed keys:
  - Line
  - Hold
  - Goodbye
- automatic network configuration
Figure 1 shows the Avaya 2033 IP Conference Phone.

**Figure 1: Avaya 2033 IP Conference Phone**

- Microphone (hidden)
- Status indicator LEDs
- Speaker
- LCD display screen
- Navigation keys
- Services key
- Microphone
- Volume control keys
- Message (Inbox) key
- Hold key
- Soft keys (self-labeled)
- Line key
- Goodbye key
- Dialpad
- Mute key
Extension microphones

The Avaya 2033 IP Conference Phone supports up to two extension microphones that extend the microphone range in large rooms. Each extension microphone has a Mute button and an LED indicator to indicate the current mute state.

Figure 2 shows an extension microphone.

Figure 2: Extension microphone
Telephone controls

Use the **Volume control** buttons to adjust the volume of the ringer and speaker.

Use the **Mute** key on the main unit or any extension speaker to mute the speaker. The Status indicator LED blinks red when mute is activated.

**Note:** Pressing the Mute key on the extension microphone toggles the mute state of the entire telephone, not just the microphone.

Your **Mute** key functionality is enabled or disabled by your system administrator. Contact your system administrator to determine if your **Mute** key is enabled.

If your **Mute** key is enabled, press the **Mute** key to listen to the receiving party without transmitting your voice. Press the **Mute** key again to return to two-way conversation.

If your **Mute** key is not enabled, pressing the **Mute** key places the call on hold. Press the **Mute** key again to restore the active call or press the line key to restore the active call. You cannot retrieve this call from hold by pressing the Hold key.

Use the **Line** (DN) key to access the single line and activate on-hook dialing. No status icon or LED is provided.
Use the **Goodbye** key to terminate an active call.

Press the **Hold** key to put an active call on hold. Press the **Line** (DN) key to return to the caller on hold.

Press the **Message (Inbox)** key to access your voice mailbox.

Use the **Navigation** keys to scroll through menus and lists appearing on the LCD screen.

Arrows appear on the left side of the display screen to indicate there is more information to be displayed.

Soft keys are located below the LCD screen. The LCD screen above the key changes, based on the active soft key function. Refer to “Soft keys” on page 21 for further information.

Press the **Shift** soft key labeled >> to access the second layer of soft keys.

**Note:** When a triangle appears before a key label, the feature is active.
About the Avaya 2033 IP Conference Phone

Press the **Services** key and use the **Navigation** keys to access the following items:

- **Telephone Options:**
  - Volume adjustment
  - Contrast adjustment
  - Language
  - Date/Time
  - Local DialPad Tone
  - Set Information
  - Ring type
  - Call timer
  - Live Dial Pad

- **Password Admin:**
  - Station Control Password

- **Virtual Office Login and Virtual Office Logout** (if Virtual Office is configured)

- **Test Local Mode and Resume Local Mode** (if Avaya CS 1000 Media Gateway 1000B (Avaya MG 1000B) is configured)

*Note 1:* Press the **Services** key to exit from any menu or menu item.

*Note 2:* The Password Admin menu may not be available on your Avaya 2033 IP Conference Phone. Consult your system administrator.
Telephone display

The Avaya 2033 IP Conference Phone has two display areas:

- The upper display area contains single-line information for items such as the caller number, caller name, feature prompt strings, user-entered digits, date and time information, and set information.
- The lower display area provides soft key label information. Refer to “Soft keys” on page 21 for further information.

Figure 3 shows the LCD screen.

**Figure 3: Avaya 2033 IP Conference Phone LCD screen**

![Figure 3: Avaya 2033 IP Conference Phone LCD screen](image)

**Cleaning the display screen**

Gently wipe the screen with a soft, dry cloth.

**CAUTION**

Do not use any liquids or powders on the phone. Using anything other than a soft, dry cloth can contaminate telephone components and cause premature failure.
**Soft keys**

The Avaya 2033 IP Conference Phone has three soft keys. A maximum of 10 functions can be assigned to these soft keys. Your system administrator assigns functions to the soft keys in layers.

Use the **Shift (>>)** key to navigate the layers of soft keys. If there are only three functions assigned to the soft keys, the **Shift (>>)** key does not appear and all three functions are displayed.

**Figure 4** shows the soft keys on the display area.

**Figure 4: Soft keys**

![Soft keys on the display area](image)

The soft key label has a maximum of six characters. Each soft key includes the soft key label and an icon. When a soft key is in use, a flashing icon appears at the beginning of the soft key label, and the label shifts one character to the right. (If the label is six characters long, the last or rightmost character is truncated.) If a soft key is enabled, the icon state changes to On. It remains in the on state until the soft key is pressed again. This cancels the enabled soft key and turns the icon off, returning the soft key label to its original state.

**Telephone status indicators**

The Avaya 2033 IP Conference Phone uses three bi-color LED lights, located around the speaker, to indicate the telephone status.
Table 3 lists the telephone state corresponding to the status indicator.

**Table 3: Status indicators**

<table>
<thead>
<tr>
<th>LEDs</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid green</td>
<td>Active call</td>
</tr>
<tr>
<td>Flashing red</td>
<td>Incoming call</td>
</tr>
<tr>
<td>Blinking red</td>
<td>Mute</td>
</tr>
</tbody>
</table>

The idle telephone display also indicates if there is a message waiting or missed call.

*Note:* You may also hear an audio Message Waiting Indicator (stutter or beeping dial tone) when you go off-hook.

Each extension microphone also has an LED indicator, indicating the mute status of the telephone.

**Call features and Flexible Feature Codes**

System administration is required for call features and Flexible Feature Codes (FFCs). Contact your system administrator to configure these features and codes on your telephone.

Call features and FFCs must be assigned to your telephone and supported by system software.

**Security features**

Your Station Control Password (SCPW) enables the following security features:

- Electronic Lock to prevent others from making calls from your telephone
- Password-protected telephone features (for example, Remote Call Forward)
Your system administrator defines your initial SCPW. Contact your system administrator for detailed information.

To change your SCPW:

1. Press the Services key.

2. Press the Navigation keys to scroll and highlight Password Admin.

3. Press the Select key.

4. Use the dialpad to enter your password at the prompt.

5. Press the Navigation keys to scroll and highlight New Password.

6. Press the Select key.

7. Use the dialpad to enter the new password.
8. Press the Select key to accept the new password.

**Note:** If you are locked out of your Avaya 2033 IP Conference Phone, or forget your SCPW, contact your system administrator.
Connect the Avaya 2033 IP Conference Phone components

Before you begin

Note: Your Avaya 2033 IP Conference Phone supports both AC power and Power over Ethernet (PoE) options. To use Power over Ethernet, where power is delivered over CAT5 cable, the LAN must support Power over Ethernet, and an AC adapter is not required. If necessary an AC power supply can be used, when the Power over Ethernet option is not available.

CAUTION
Damage to equipment

Do not plug the Avaya 2033 IP Conference Phone into a regular telephone jack. Doing so results in severe damage to the IP phone. Consult your system administrator to ensure that you plug your set into a 10/100BaseT network interface.
Steps

1. Connect one end of the CAT5 Ethernet cable to the network interface located on the back of the Power over Ethernet (PoE) module. (see Figure 5). Plug the other end of the CAT5 Ethernet cable in to the IP network interface.

Figure 5: Power Over Ethernet (PoE)

2. Connect the CAT5 Ethernet cable attached to the PoE module to the IP Phone. Thread the CAT5 Ethernet cable through the channel on the bottom of the IP Phone and plug it into the PoE module port on the IP Phone.

   — If you are using local power, connect one end of the AC adapter cord to the power supply port located on the back of the PoE module. Thread the cord through the channel to the bottom of the PoE module and plug the other end into the AC power source. Ensure the correct AC power transformer is used. The voltage rating on the transformer must match the wall outlet voltage.
3. To connect an extension microphone, run the microphone cord through one of the side channels on the bottom of the main unit, and plug it into one of the extension microphone jacks. See Figure 6.

*Note:* A maximum of two extension microphone jacks are supported.
Configure options on the Avaya 2033 IP Conference Phone

The Avaya 2033 IP Conference Phone Services menu lists the following submenus:

• The Telephone Options menu enables you or your system administrator to configure telephone preferences.

• The Password Admin menu enables you or your system administrator to change the Station Control Password.

• The Virtual Office Login and Test Local Mode (for Branch Office) menus are listed when an Avaya 2033 IP Conference Phone Class of Service is set for Virtual Office and Branch Office. For more information, see page 73.

Note: The Password Admin, Virtual Office Login, and Test Local Mode menus may not be available on your Avaya 2033 IP Conference Phone. Consult your system administrator.

The Telephone Options menu offers the following options:

— Volume adjustment
— Contrast adjustment
— Language
— Date/Time
— Local Dialpad Tone
— Set Info
— Ring type
— Call Timer
— Live Dialpad

Note: When an option has a sublist, an ellipsis (...) appears after the option.
Use the Telephone Options menu

To use the Telephone Options menu:

1. Press the Services key.

2. Press the Navigation keys to scroll and highlight Telephone Options.

3. Press the Select key.

4. Press the Navigation keys to scroll and highlight an option (for example, Language...).

5. Press the Select key. The display provides information required to adjust your selection.

6. Choose one of the following:
   — Press the Select key to save your changes.
   — Press the Cancel key to keep existing settings.
**Adjust volume**

To adjust the volume, press the **Services** key, select **Telephone Options** and select **Volume adjustment** from the menu. Choose one of the following:

- Ringer
- Handset Listen
- Buzzer

*Note 1:* The option On Hook Dialing Listen is not applicable to the Avaya 2033 IP Conference Phone.

*Note 2:* Volume can also be adjusted using the **Volume control** buttons. See “Telephone controls” on page 17.

**To adjust Ringer volume:**

1. Press the **Navigation** keys to scroll and highlight **Ringer**.

2. Press the **Select** key.

3. To increase or decrease the Ringer volume, choose one of the following:
   — Press the **Down/Up** soft keys.
   — Press the **Navigation** keys.
Configure options on the Avaya 2033 IP Conference Phone

To adjust Speaker volume:

1. Press the Navigation keys to scroll and highlight Handset Listen.

2. Press the Select key.

3. To increase or decrease the speaker volume, choose one of the following:
   — Press the Down/Up soft keys.
   — Press the Navigation keys.

4. Choose one of the following:
   — Press the Select key to save the volume level and return to the Telephone Options menu.
   — Press the Cancel key to keep existing settings.
To adjust the Buzzer volume:

1. Press the Navigation keys to scroll and highlight **Buzzer**.

2. Press the **Select** key.

3. To increase or decrease the buzzer volume, choose one of the following:
   - Press the Down/Up soft keys.
   - Press the Navigation keys.

4. Choose one of the following:
   - Press the **Select** key to save the volume level and return to the Telephone Options menu.
   - Press the **Cancel** key to keep the existing settings.
Configure options on the Avaya 2033 IP Conference Phone

Adjust display screen contrast

To adjust the LCD screen contrast, press the Services key, select the Telephone Options, and select Contrast adjustment from the menu.

To adjust display screen contrast:

1. To increase or decrease the display contrast level, choose one of the following:
   — Press the Down/Up soft keys.
   — Press the Navigation keys.

2. Choose one of the following:
   — Press the Select key to save the contrast level and return to the Telephone Options menu.
   — Press the Cancel key to keep existing settings.

4. Choose one of the following:
   — Press the Select key to save the volume level and return to the Telephone Options menu.
   — Press the Cancel key to keep existing settings.
Select a language

The display is available in multiple languages. To choose a language, press the Services key, select Telephone Options, and select Language from the menu.

If the Language setting is password-protected, you must enter a password (SCPW) to change the language. If you enter an incorrect password, an error message is displayed. If you enter an incorrect password more than three times, the password functionality is locked. Contact your system administrator to unlock the password.

To select a language:

1. Press the Navigation keys to scroll and highlight the desired language (for example, German [Deutsche]).

2. Choose one of the following:
   — Press the Select key to save the language and return to the Telephone Options menu.
   — Press the Cancel key to keep existing settings.

Select Date/Time format

Several Date/Time formats are available. Formats are based on the 12-hour clock and the 24-hour clock. To select a date/time format, press the Services key, select Telephone Options, and select Date/Time from the menu.
To select a date/time format:

1. Press the Navigation keys to scroll and highlight the desired format. Sample formats appear in the upper-right side of the display area.

2. Choose one of the following:
   - Press the Select key to save the format and return to the Telephone Options menu.
   - Press the Cancel key to keep existing settings.

Select Local DialPad Tone

The Local DialPad Tone option enables a pressed telephone dial key to produce Dual Tone Multi-Frequency (DTMF) sounds, a single tone, or no sound. To choose a local dialpad tone, press the Services key, select Telephone Options, and select Local DialPad Tone from the menu.

To select Local DialPad Tone:

1. Press the Navigation keys to scroll and highlight one of the following dialpad tones:
   - None to disable all tones
   - Short Click to enable a single tone for all keys
   - DTMF to turn on a separate DTMF tone for each key
Configure options on the Avaya 2033 IP Conference Phone

View Set Information

The following telephone-specific information appears in the Set Info option:

- General Information
- Set IP Information
- Ethernet Information
- Server Information
- Location Information
- Encryption Information

To view set information, press the Services key, select Telephone Options, and select Set Info from the menu.

To view set information:

1. Press the Navigation keys to scroll through the list containing set information.

2. Press the Cancel key to return to the Telephone Options menu.
Configure options on the Avaya 2033 IP Conference Phone

Select Ring type

The ring type option sets the telephone’s ring tone. To choose a ring type, press the Services key, select Telephone Options, and select Ring type from the menu.

To choose a ring type:

1. Press the Navigation keys to scroll and highlight one of the ring types.

2. Press the Play key to sample the ring tone.

3. Choose one of the following:
   — Press the Select key to save the ring type and return to the Telephone Options menu.
   — Press the Stop key and use the Navigation keys to select a different ring type.
   — Press the Cancel key to keep existing settings.
Select Call Timer

The call timer measures how long you are on each call.

To enable or disable the call timer, press the Services key, select Telephone Options, and select Call Timer from the menu.

To Enable/Disable Call Timer:

1. Press the Navigation keys to select between:
   - Call Timer: On
   - Call Timer: Off

2. Choose one of the following:
   - Press the Select key to save the configuration and return to the Telephone Options menu.
   - Press the Cancel key to keep existing settings.

Select Live Dial Pad

Use live dialpad to dial a number using the telephone dialpad without having to pick up the handset or press the handsfree key.

To configure live dialpad, press the Services key, select Telephone Options, and select Live Dial Pad from the menu.
To configure Live Dial Pad:

1. Press the Up/Down navigation keys to scroll and highlight Live Dial Pad.

2. Press the Select soft key.

3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   — On
   — Off

4. Choose one of the following:
   — Press the Select soft key to save the selection.
   — Press the Cancel soft key to keep the existing configuration.
Make a call

This section describes features associated with making a call. You have several ways to make a call from an Avaya 2033 IP Conference Phone.

Steps

1. Press the Line (DN) key.

2. Dial the number.

3. Press the Goodbye key to terminate an active call.

Use Live Dialpad

Use live dialpad to dial the number before lifting the handset.

To use live dialpad:

1. Dial the number.

2. When the called party answers, begin speaking.
3. Press the **Goodbye** key to terminate an active call.

---

**Use Predial**

Use the Predial feature to enter, preview, and edit numbers before dialing.

**To use Predial:**

1. Without selecting the **Line** (DN) key, enter the number to be dialed.
2. Press the **Line** (DN) key to dial the number.

**To edit a Predialed number:**

1. Without selecting the **Line** (DN) key, enter the number to be dialed.
2. Choose one of the following:
   - To erase all numbers, press the **Clear** key. Re-enter numbers to be dialed.
Activate Ring Again

Use the Ring Again feature if you receive a busy tone or if there is no answer. Your IP Phone rings when the person you called becomes available. Ring Again automatically redials the number.

To activate Ring Again:

1. Dial a number and receive a busy tone or no answer.

2. Choose one of the following:
   — Press the Ring Again (RngAgn) key.
   — Enter the Ring Again Activate FFC.

To call a Ring Again party when you receive notification:

1. After receiving the notification tone, press the Line (DN) key.
To deactivate Ring Again before notification:

Choose one of the following:

— Before hearing the notification tone, press the Ring Again (RngAgn) key a second time.

— Enter the Ring Again Deactivate FFC.

Redial last number called

Use the Last Number Redial feature to automatically redial the last dialed number.

To use Last Number Redial:

Press the Line (DN) key twice (the last number dialed is automatically redialed).

Use Speed Call

Use the Speed Call feature to place internal and external calls by dialing a one-, two-, or three-digit code.
To create a Speed Call number:

1. Press the Speed Call Controller (SpcCtl) key. The triangular icon flashes, indicating programming mode.

2. At the prompt:
   — Enter a one-, two-, or three-digit code (0-999).
   — If required, enter the access code (for example, “9”).
   — Enter the telephone number (internal, external, or long-distance number).

3. Press the Speed Call Controller (SpcCtl) key again to save the code and number. The icon quits flashing.

To make a Speed Call:

1. Press the Line (DN) key.

2. Press the Speed Call Controller (SpcCtl) key.

3. Dial the Speed Call code to automatically dial the number.
Make a System Speed Call

Use the System Speed Call feature to dial Speed Call codes that override dialing restrictions placed on your telephone.

To make a System Speed Call:

1. Press the Line (DN) key.

2. Choose one of the following:
   — Press the System Speed Call (SScUsr) key.
   — Press the System Speed Call Controller (SScCtl) key.

3. Dial the Speed Call code to automatically dial the number.
Answer a call

Each incoming call causes the telephone to ring and the Message Indicator lamps to flash.

To answer a call:

Press the Line (DN) key.
While on an active call

This section describes features available during an active call.

**Place a call on hold**

Use the Hold feature when you are talking on one line and another call arrives on a second line. Retain the original call by putting it on hold, and then answer the second call.

**To place a call on hold:**

Press the **Hold** key.

**To retrieve a call on hold:**

Press the **Line** (DN) key.

**Transfer a call**

Use the Transfer feature to redirect a call to the appropriate person.

**To use the Transfer feature to direct a call to a third party:**

1. Press the **Transfer (Trans)** key. The original call is put on hold, and a dial tone sounds.
While on an active call

2. Dial the DN to which the call is transferred.
   To see the DN being dialed, use the Navigation keys to scroll down to the next line.

3. When that number rings or a person answers, press the Transfer (Trans) key to connect the calling party.

To return to the original call, if the transfer is incomplete:

If the person called is not available, press the Line (DN) key to reconnect to the original call.

Use Timed Reminder Recall

Use the Timed Reminder Recall feature to receive a reminder tone when a transferred call is not answered.

To activate Timed Reminder Recall:

1. Press the Transfer (Trans) key. The original call is put on hold, and a dial tone sounds.

2. Dial the number to which the call is being transferred.
   To see the DN being dialed, use the Navigation keys to scroll down to the next line.
While on an active call

3. Press the **Transfer (Trans)** key again to start the recall timer.

   *Note*: If the transfer is complete, the recall timer stops.

If the transferred call is not answered, your telephone rings.

1. Press the **Line** (DN) key to reconnect to the original caller.

2. Choose one of the following:
   - Press the **Transfer (Trans)** key and repeat the transfer (to a different DN).
   - If the transfer is picked up while you are on the line, press the **Goodbye** key to complete the transfer.

**Use Call Park**

Use the Call Park feature to hold temporarily (park) and retrieve a call from any telephone. Using Call Park does not tie up a line and, when configured network-wide, can be used across networks. A **System Park Extension** can be set to automatically park most calls.
While on an active call

To park a call on the System Park DN or your own DN:

During an active call, press the Park key twice.

Note: By default, the call is parked on your DN unless a System Park is enabled to park calls automatically on the system.

To park a call on a DN other than the System Park DN or your own DN:

1. Press the Park key.

2. Dial the DN where you want to park the call.

3. Press the Park key.

To retrieve a parked call:

1. Press the Line (DN) key.

2. Press the Park key.
While on an active call

3. Dial the DN where you parked the call.

*Note:* If a parked call is not retrieved within a specified time period, it rings back to your telephone or the attendant.

---

**Record a Calling Party Number**

Use the Calling Party Number feature to record a caller’s number, or to charge a call to an account number, during an established call.

**To record a caller’s number for accounting purposes:**

1. Press the *Call Party (CParty)* key. The caller is placed on hold.

2. Dial a charge account number or the caller’s number.

   *Note:* For information on using the *Charge* key, see “Charge a call or charge a forced call” on page 63.

3. Press the *Call Party (CParty)* key to return to the call.

---

**Trace a malicious call**

Use the Malicious Call Trace feature to trace nuisance calls within your system.

*Note:* Malicious Call Trace is not a default feature. Contact your system administrator to configure this feature on your telephone.
To activate Call Trace:

1. Press the **Transfer (Trans)** key or the **Conference (Conf)** key.

2. Dial the Special Prefix (**SPRE**) code followed by **83** or enter the **Call Trace FFC** to reconnect automatically.

   **Note:** Contact your system administrator for the Call Trace feature **SPRE** code.
While away from your desk

This section describes features that are used when you are away from your desk.

**Use Call Forward**

Use the Call Forward feature to direct incoming calls to ring on another line (DN). If the telephone is in the process of ringing, that call cannot be forwarded.

**To forward your calls or change the forward number:**

1. Press the **Forward (Fwd)** key.  
   A flashing triangle icon appears next to the label **Fwd**.

2. Dial the DN where you want to forward your calls.

3. Press the **Forward (Fwd)** key.  
   The triangle icon stops flashing to indicate Call Forward (CFwd) is active.

**To deactivate Call Forward:**

Press the **Forward (Fwd)** key.  
The triangle icon is removed to indicate Call Forward (CFwd) is deactivated.
To reinstate Call Forward to the same number:

Press the *Forward (Fwd)* key twice.

**Use Internal Call Forward**

Use Internal Call Forward to allow only calls originating at internal DNs to ring at another DN. Calls originating outside your telephone system still ring at your telephone. Current incoming calls cannot be forwarded.

**To activate Internal Call Forward:**

1. Press the *Line (DN)* key and enter the *Internal Call Forward Activate* FFC.
2. Dial the DN to which your internal calls will be forwarded.
3. Press the *Goodbye* key.

**To deactivate Internal Call Forward:**

Press the *Line (DN)* key and enter the *Internal Call Forward Deactivate* FFC.

**Use Remote Call Forward**

Use the Remote Call Forward feature to forward calls (from any telephone other than your own) to any telephone.
While away from your desk

To activate Remote Call Forward:

1. Press the Line (DN) key.

2. If calling from a telephone outside the system, dial your direct system access number and wait for dial tone.

3. Dial the Remote Call Forward Activate FFC to activate the feature.

4. Dial your Station Control Password. A dial tone sounds.

5. Choose one of the following:
   — Dial your DN.
   — To forward calls to the previous call forward number, press the # key. (Do not perform steps 6 and 7.)

6. Dial the number to which calls are being forwarded. If calls are forwarded to an invalid number, a fast busy signal sounds.

7. Press the # key.
To deactivate Remote Call Forward:

1. Press the **Line** (DN) key.

2. If calling from a telephone outside the system, dial the direct system access number and wait for the dial tone.

3. Dial the **Remote Call Forward Deactivate** FFC.

4. Dial your **Station Control Password**.

5. After hearing the dial tone, dial your DN.

6. Press the **#** key.

---

**Secure your telephone**

The Electronic Lock feature is used to prevent others from making calls from your phone. This feature is controlled using your Station Control Password. To change your **Station Control Password**, refer to “Security features” on page 22.
While away from your desk

To lock your telephone:

1. Press the Line (DN) key.

2. Dial the Electronic Lock Activate FFC.

3. Dial your Station Control Password.

4. Choose one of the following:
   — If dialing locally, press the Goodbye key.
   — If dialing the FFC remotely, dial your DN.

To unlock your telephone:

1. Press the Line (DN) key.

2. Dial the Electronic Lock Deactivate FFC.

3. Dial your Station Control Password.
4. Choose one of the following:

   — If dialing locally, press the **Goodbye** key.

   — If dialing the FFC remotely, dial your DN.
Talk with more than one person

This section describes features that enable conversations between more than two people.

*Note:* Contact your system administrator for information on accessing audio conference bridge applications.

### Set up a conference call

Use the Conference feature to set up a conference call for three or six people, including yourself. The number of people the Conference feature supports depends on your telephone configuration. Contact your system administrator to determine your configuration.

**To set up a conference call:**

1. While on a call, press the **Conference** (Conf) key to place the call on hold. You receive dial tone.

2. Dial the number of the person you want to add to the conference call. You can talk privately to the person you are adding at this time.

3. Press the **Conference** (Conf) key a second time to conference all parties together.
If the person you attempt to add to the conference is unavailable:

1. Press the **Goodbye** key.

2. Press the **Line** (DN) key to return to your original call.

**Use Group Call**

Use the Group Call feature to automatically call members of a predefined group, one at a time, until they all answer.

**To call group members:**

1. Press the **Line** (DN) key.

2. Enter the **Group Call** FFC.

   — The feature automatically calls all group members.

   — The telephone numbers of the group members display as they answer.

   — If a person who is in your group is on a conference call or another group call, then that person is not connected to your group call.

   — After everyone in the group has answered, only the person who made the group call can put the call on hold.
Talk with more than one person

To answer a Group Call:

Press the Line (DN) key.

*Note:* When you answer a Group Call, three 10-second tones notify you that there is a group call on your extension.

To end a Group Call:

Press the Goodbye key.

*Note:* When the person who made the Group Call disconnects, the call terminates for all members of the group. However, the members of the Group Call can disconnect from the call and not affect other members on the call.
Work without interruption

This section describes features that provide uninterrupted work time.

Use Make Set Busy

Use the Make Set Busy feature to make your telephone appear busy to all callers.

To activate Make Set Busy:

1. Press the Line (DN) key.

2. Enter the Make Set Busy Deactivate FFC.

To deactivate Make Set Busy:

1. Press the Line (DN) key.

2. Enter the Make Set Busy Deactivate FFC.
Additional call features

Contact your system administrator to determine if the following call features are available on your telephone.

Use Call Page Connect to make an announcement

Use the Call Page Connect feature to make an announcement over a paging system.

To use Call Page:

1. Press the Line (DN) key.
2. Dial the Page Trunk Access Code to complete the connection to the page system.
3. Make your announcement.
4. Press the Goodbye key.

Charge a call or charge a forced call

Use the Call Charge feature to charge a call to a specific account. The Forced Charge feature charges long-distance calls from a telephone restricted to local calls.
To charge a local or long-distance call to an account before you dial:

1. Press the Line (DN) key.
2. Press the Charge key or dial the Call Detail Recording FFC.
3. Dial the charge account number.
4. When the dial tone sounds, dial the number.

To charge a call in progress:

1. Choose one of the following:
   — Press the Transfer (Trans) key.
   — Press the Conference (Conf) key.
2. Press the Charge key or dial the Call Detail Recording FFC.
3. Dial the charge account number.
4. Press the Line (DN) key to return to the call.
To charge a call to an account when you transfer a call:

1. Press the **Transfer (Trans)** key. The call is placed on hold.

2. Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. After the dial tone, dial the number to which the call is to be transferred.

5. Press the **Transfer (Trans)** key when you hear a ring tone.

   **Note:** To talk privately with the person at the transfer number, wait until the person at the transferred number answers. Press the **Transfer (Trans)** key when you are ready to transfer the call.

To charge a call to an account when you add someone to a conference call:

1. Press the **Conference (Conf)** key. The call is placed on hold.
Use Forced Camp-on

Use the Forced Camp-on feature to automatically ring another telephone (internal or external) immediately after that telephone disconnects from its current call.

To use Forced Camp-on:

1. Enter the **Override** FFC to initiate a Forced Camp-on.
   
The person you called receives a tone. You receive a ring/ringback signal or a busy/engaged signal, depending on the options chosen. You are now camped on to the number you dialed.

2. Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. Dial the number of the person you want to add to the conference.

5. Press the **Conference (Conf)** key.

You receive a busy signal after dialing a telephone number.

66
To answer a call camped on to your extension:

When the telephone rings, press the Line (DN) key.

Use Enhanced Override

Use the Enhanced Override feature to override an active call after you attempt a Forced Camp-on. Use Enhanced Override to make a simple call or a consultation call, such as placing a call on hold and calling another party.

To use Enhanced Override:

You receive a busy signal after dialing a telephone number:

1. Enter the Override FFC to initiate a Forced Camp-on.
   - If either person on the call disconnects at this time, you receive an overflow (fast busy/engaged) signal.
2. Enter the **Override** FFC again.

   — The other two persons on the call receive an override tone and a conference call is established between the three of you. If anyone disconnects, the other two persons remain connected.

**To disconnect Enhanced Override:**

Press the **Goodbye** key.

---

**Override a busy signal**

Use the Override feature to override a busy signal and interrupt another call.

**To override a busy/engaged signal:**

You dial a telephone number and receive a busy signal.

Enter the **Override** FFC.

The people in the targeted call receive a tone for approximately one second. After the Override feature joins you to their call, a short tone repeats every 16 seconds.
To end the connection:

Press the **Goodbye** key.

---

**Use Privacy Release**

Use the Privacy Release feature to enable one or more people who share your DN to join a call.

**To use Privacy Release on an established call:**

Press the **Privacy Release (PrvRls)** key during a call.

A person joins the call by pressing the shared number (DN) key on the person’s telephone (Multiple Appearance DN feature).

---

**Use Radio Paging**

Use the Radio Paging feature to page a person and stay on the line until the person answers. The paged person answers the call after entering a special Page Meet-me code from any telephone.

**To use Automatic Preselection (Meet-me page):**

1. Press the **Line** (DN) key.

2. Dial the **Radio Paging Access** FFC. The paging tone sounds (two beeps followed by a dial tone).
3. Dial the number of the party you want to page. After dialing, the ringback tone sounds.

**Note:** The paged person can use any telephone to enter a Radio Paging Answer FFC, plus the person's own DN.

4. If your call goes unanswered for a preset time period and a 15-second high-pitched tone sounds followed by silence, press the **Goodbye** key.

**To use Automatic Post selection:**

The called party is either busy on the telephone or away from the desk. To page the called party, you do not need to redial the number of the called party.

1. Press the **Radio paging (RadPag)** key. A special dial tone sounds.

2. Dial the **Radio Paging Access** FFC. The ringback tone sounds.

   **Note:** The paged person can use any telephone to enter a Radio Paging Answer FFC, plus the person's own DN.

3. If your call goes unanswered for a preset time period and a 15-second high-pitched tone sounds followed by silence, press the **Goodbye** key.
To answer a Radio Page:
If you carry a Radio Pager, a page indicates that someone dialed your line (DN). If the Radio Page system is set up to function in Meet-me mode, you can answer the page call from any telephone.

1. Press the Line (DN) key.

2. Dial the **Radio Page Answer** FFC. The paging tone sounds.

3. Dial your own DN to connect to the paging caller. If the caller has hung up, a steady, high-pitched (Number Unavailable) tone sounds.

**Using voice mail soft keys**

*Note:* This feature is not available on all telephones. Contact your system administrator to determine if this feature is available on your telephone.

When this feature is enabled, then when you access your voice mail, either by pressing the Messages/Inbox key, or by dialing your voice mail access number, voice mail soft keys are displayed that let you perform various actions for your messages.

The following soft keys are displayed:

- **Play**
- **Delete**
- **Call**
- **More...**
- **Stop**
- **Conf**
- **Reply**
- **More...**
- **Comp**
- **Forwr'd**
- **Bye**
- **More...**

Voice mail soft keys are displayed:

- when you press the Messages/Inbox key (internal and external)
- when you dial the voice mail access number manually (internal only)
Virtual Office

When you are away from your office telephone, use the Virtual Office feature to transfer calls and all of your telephone’s features to a remote telephone.

**Note 1:** Consult your system administrator to verify if the Virtual Office feature is available for your use.

**Note 2:** When used as the remote telephone, the Avaya 2033 IP Conference Phone can activate only an *Avaya 1110 IP Deskphone*, *Avaya 1210 IP Deskphone*, *Avaya 2033 IP Conference Phone* and an *IP Phone 2001* for Virtual Office.

If the IP Phone is configured for Virtual Office, a Virtual soft key is displayed.

**Virtual Office Login**

To activate Virtual Office from this IP Phone on your Office IP Phone:

1. Press the **Virtual** soft key.

2. Enter your User ID (for example, your DN including the access code) at the prompt.

   **Note:** This number must be an ESN number.

3. Press the **Select** key.
4. At the prompt, enter the home Station Control Password (SCPW).

**Note 1:** If the User ID is not found locally, the message “Locating Remote Server” appears.

**Note 2:** After three failed login attempts, wait one hour before attempting to log in again.

A successful login transfers all the features, time, date, and tones to your remote telephone from your office telephone.

---

**Virtual Office on your remote telephone**

Figure 7 on page 74 through Figure 10 on page 75 show IP Phones logged on to an Avaya 2033 IP Conference Phone using Virtual Office.

**Figure 7: Logged on to an Avaya 2033 IP Conference Phone using an Avaya 2033 IP Conference Phone**
Additional features

Figure 8: Logged on to an Avaya 2033 IP Conference Phone using an IP Phone 2001

Figure 9: Logged on to an Avaya 2033 IP Conference Phone using an IP Phone 2002

Figure 10: Logged on to an Avaya 2033 IP Conference Phone using an IP Phone 2004
If you are logging in to your Avaya 2033 IP Conference Phone from an IP Phone with feature keys, the feature keys remain empty (except for the appearance of your DN) because your Avaya 2033 IP Conference Phone does not support feature keys.

A User information line that lists the number of your office telephone appears on all displays.

**Virtual Office on your office telephone**

When activated for Virtual Office by a remote telephone, your office telephone is *logged out* and is no longer operational.

A Logged Out message appears on your telephone, alerting you that your office telephone is being used for Virtual Office.

To regain operation of a telephone being used for Virtual Office:

Choose one of the following:

- To completely disconnect your office telephone from the remote telephone:
  a. Press the **Home** key.
  b. Enter your User ID and password (this logs the office telephone back on to your office network).

- To use your office telephone as the remote telephone for Virtual Office, press the **Virtual (Virtual)** key to log in to another IP Phone.

**Virtual Office logout**

To log out of Virtual Office, press the Virtual soft key.
**Automatic log out from Virtual Office**

Your remote Virtual Office IP Phone may be configured to automatically log out of Virtual Office after a predetermined period of inactivity. When automatic logout is about to occur, the following message is displayed on the IP Phone: "Logout phone now?"

Press **Yes** to allow the IP Phone to log out of Virtual Office or press **No** to remain logged in to Virtual Office and reset the IDLE timer. If no key is pressed, the IP Phone logs out of Virtual Office.

**Emergency calls on your Remote IP Phone**

If you make an emergency call while logged in to Virtual Office on a Remote IP Phone, the call is placed to the local emergency service, not to your home office emergency service.

*Note*: Some IP Phones are configured as Virtual Office-only telephones and have no assigned DN. However, these IP Phones can still be used to make emergency calls. "Emergency Calls only " is displayed on the IP Phone display when not logged in to Virtual Office. When the phone goes off-hook, dial tone is available for emergency calls only. All other calls are restricted.
**Troubleshoot Virtual Office**

When you use Virtual Office, error messages may display on-screen. Table 4 lists error messages and actions to correct the causes.

Additional features

Avaya CS 1000 Media Gateway 1000B

An Avaya CS 1000 Media Gateway 1000B (Avaya MG 1000B) IP Conference Phone can operate in Normal or Local mode.

Normal Mode

The IP Conference Phone registers with the main office and receives telephone services from the main office. At any time during Normal Mode, you can check local mode functionality (make and receive calls) by enabling Local Mode and returning to Normal Mode. After testing, you can return to Normal Mode by using the Resume Normal Mode command or by waiting for 10 minutes.

Local Mode

If the WAN connection is lost, the IP Conference Phone loses communication with the main office Terminal Proxy Server (TPS). The IP Conference Phone then registers with the Avaya MG 1000B and receives telephone services from the branch office. When in Local Mode, the IP Conference Phone displays "LOCAL MODE".

Test Local Mode

Use Test Local Mode to check local mode functionality (make and receive telephone calls). Test Local Mode is useful when provisioning has changed for an IP Conference Phone at a MG 1000B Controller.

1. Press the Services key.

2. Press the Navigation keys to scroll and highlight Test Local Mode.
3. Press the Select key (the telephone resets and registers to the branch office).

Resume Normal Mode

Use the Resume Normal Mode command to return to Normal Mode after testing survival functionality.

*Note:* If the Resume Normal Mode command is not performed after testing, the telephone automatically returns to Normal Mode in 10 minutes.

1. Press the Services key to access the Services menu.

3. Press the Select key (the telephone registers back to the main office).
**Troubleshoot MG 1000B**

When using MG 1000B, error messages may display on-screen. Table 5 lists error messages and actions to correct the causes.

Hospitality features

Hospitality features are intended for hotel operations.

**Set Automatic Wake-Up**

Use the Automatic Wake-Up feature to receive a timed reminder call. From your telephone, you can program the system to automatically place a call to yourself at a predetermined time. When you answer the call, recorded music plays for up to 30 seconds, followed by a prerecorded announcement or the attendant.

**To enter the time for an Automatic Wake-Up call:**

1. Press the **Line** (DN) key.

2. Dial the **Automatic Wake-Up Request** FFC.

3. Dial the **Automatic Wake-Up** time in a 24-hour time format (hhmm). A tone sounds to confirm the time.

   **Note:** In a 24-hour time format, 7:30 a.m. is entered as 0730; 9:45 p.m. is entered as 2145.

4. Press the **Goodbye** key.
To quit an Automatic Wake-Up call:

1. Press the **Line** (DN) key.

2. Dial the **Automatic Wake-Up Quit** FFC.

3. Press the **Goodbye** key.

To verify the time for the Automatic Wake-Up call:

1. Press the **Line** (DN) key.

2. Dial the **Automatic Wake-Up Verify** FFC.

3. Dial the **Automatic Wake-Up** time in a 24-hour time format (hhmm). If your query matches the preset time, a confirmation tone sounds.

   **Note:** In a 24-hour time format, 7:30 a.m. is entered as 0730; 9:45 p.m. is entered as 2145.

4. Press the **Goodbye** key.
**Flexible Feature Codes**

Use this worksheet to record the FFCs assigned by your system administrator.

Flexible Feature Codes
Terms you should know

Attendant

A telephone operator in your organization.

Avaya Communication Server 1000 (Avaya CS 1000)

Your office communication system.

Calling Party Name Display

Information, such as the caller’s name and telephone number, appearing on the LCD screen. The system must have CPND enabled.

Category 5 (Cat5)

Balanced 100 Ohm cable and associated connecting hardware whose transmission characteristics are specified up to 100 MHz. It is used by 10BaseT, 100BaseT4, and 100BaseTX installations. The cable normally has four pairs of copper wire. Cat5 is the most popular cable used in new installations today.

Date/time display

The current date and time when the telephone is in an idle state.

Directory Number (DN)

A number consisting of one to seven digits for a telephone. Also known as an extension number.

Fastbusy

A signal indicating that all outgoing lines are busy or an error condition exists (for example, a misdialed number).

Feature display

An area that shows status information about the feature in use. It also displays the name and status of the active session.
Terms you should know

Fixed key
The hard-labeled keys on your telephone.

Flexible Feature Codes
Specialized codes entered using the dialpad that enable features (for example, Ring Again).

Goodbye key
A fixed key used to end an active call.

Information display
Any display of call activity, lists, prompts, and status of calls. On the Avaya 2033 IP Conference Phone, this information area is a one-line by 24-characters area. If the text message exceeds this area, a scroll arrow icon indicates that you must use the scroll keys to view the remaining text.

Information line
A one-line by 24-character area that displays date and time or application information.

Interrupted dial tone
A broken or pulsed dial tone, heard when you access some features on your telephone.

Message (Inbox)
A fixed key on the Avaya 2033 IP Conference Phone that connects to your voice messaging system when the key is pressed.

Message waiting indicator/Incoming call indicator
An LCD or an LED that indicates the status of a feature by the flash, wink, steady on, or off.
Navigation keys

Keys used to scroll through menus and lists appearing on the LCD screen.

Off-hook

Any line selected to make a call or receive an incoming call. The term *off-hook* is applied whether (a) the user presses a line key, (b) the call is automatically answered at the set, or (c) a line is automatically selected for an outgoing call.

Paging tone

A special tone heard when using the Radio Paging feature. You hear two beeps followed by dial tone.

Ringback/ring tone

A sound indicating that a call you have made is ringing at its destination.

Services key

A fixed key used to access options such as Telephone Options, Password Admin, Virtual Office Login, Virtual Office Logout, Test Local Mode, and Resume Normal Mode.

Shared Directory Number

A DN (extension) that is shared by two or more persons.

Soft keys

A set of keys programmed by your system administrator. These three keys, located directly below the display area, have four programmable layers. These keys are also used to configure parameters in the Telephone Options menu.

Special dial tone

The three consecutive tones followed by dial tone that you hear when accessing telephone features.
Terms you should know

Special Prefix code (SPRE)

Special codes entered using the dialpad, followed by a two-digit access code, that enable features (for example, Call Forward All Calls requires entry of SPRE code + 74).

Station Control Password (SCPW)

Enables security features on your phone to prevent others from making calls from your telephone and to prevent access to protected features (for example, Remote Call Forward).

Status Messages

A message displayed to inform the user of important information. A right arrow appears if more than one Status Message is present. Examples of Status Messages include: Message Waiting, All Lines Forwarded to: 6453, Do Not Disturb On, Ring Again active, and Ringer is OFF.

System or Switch

Your office communication system.

User Interface

Screen displays that interact with the end-user as a result of an action or event.
