Migration Strategy and Discontinued Order Codes

Migration Strategy

Avaya encourages users of the Secure Router 100x product to consider the Secure Router 2330 as an alternative. The Secure Router 2330 is capable of supporting up to 6 x T1/E1 interfaces, up to 6 serial interfaces in various combinations. The Secure Router 2330 is a much more flexible platform for WAN connectivity and supports features not available on the 1000 series..

Users of the Secure Router 3120 should consider the Secure Router 4134 as an alternative. The Secure Router 4134 is capable of supporting up to 3 x DS3 interfaces, 7 x serial interfaces, 31 x T1/E1 interfaces as well as other capabilities not supported by the SR3120.

Please contact your Avaya representative or Avaya Business Partner to discuss the applicability of the SR2330 and SR4134 to your SR100x and SR3120 applications.
