Patch install instructions

Service-interrupting?

Yes

1. Copy (scp) the patch zip file to the server.
2. Unzip the file: `unzip PS-6.2.5.3-85.zip -d ~cust/PS-6.2.5.3`
3. Login into the presence server as cust.
4. Change the user to root by providing required credentials.
5. Change to the patch installer directory: `cd ~cust/PS-6.2.5.3/`
6. Stop Presence Services: `/opt/Avaya/Presence/presence/bin/stop.sh`.  
Note: It is important to verify that Presence Services has stopped before proceeding with the install of the patch. This can be done using the `monit summary` command.  
The output of the command should show that all the Presence processes have stopped (displayed as not monitored), the install should not be attempted before all process have stopped.
7. Run the installation script with the install option: `./PS-6.2.5.3-85.sh -ci autoInstall_Presence_Services.properties`
8. Restart the Presence Services platform: `reboot`  
Note: Check that all the required services are reported as running. This can be done using the `monit summary` command. Some process will take time to report as running.

Verification

To verify the patch installation was successful:

1. Login into the presence server as cust.
2. Change the user to root by providing required credentials.
3. Run the `swversion.sh` command.
4. Output should list version as 6.2.5.3-85.

Failure

Please open a Service Request with Avaya Global Services for any failures associated with this patch.

## Patch uninstall instructions

Removal of the patch does not remove the security updates applied as part of this patch.

1. Login into the presence server as cust (NOTE: ensure your SSH client does not have X11 Forwarding enabled).
2. Change the user to root by providing required credentials.
3. Change to the patch installer directory: `cd ~cust/PS-6.2.5.3/`
4. Stop Presence Services: `/opt/Avaya/Presence/presence/bin/stop.sh`.  
Note: It is important to verify that Presence Services has stopped before proceeding with the install of the patch. This can be done using the `monit summary` command.  
The output of the command should show that all the Presence processes have stopped (displayed as not monitored), the install should not be attempted before all process have stopped.
5. Run the installation script with the uninstall option: `./PS-6.2.5.3-85.sh -cu autoUninstall.properties`
6. Restart Presence Services: `/opt/Avaya/Presence/presence/bin/start.sh`

Note: Check that all the required services are reported as running. This can be done using the `monit summary` command. Some process will take time to report as running.

## Security Notes

The information in this section concerns the security risk, if any, represented by the topic of this PSN.

### Security risks

ASA-2014-369 (<https://downloads.avaya.com/css/P8/documents/100183009>)

### Avaya Security Vulnerability Classification

High

### Mitigation

Install this patch to resolve the identified security risks.
