Avaya Aura® WebLM 6.3.22 Release Notes

Issue: 1.0
August 2018
Use pursuant to the terms of your signed agreement or Avaya policy
Heritage Nortel Software

“Heritage Nortel Software” means the software that was acquired by Avaya as part of its purchase of the Nortel Enterprise Solutions Business in December 2009. The Heritage Nortel Software currently available for license from Avaya is the software contained within the list of Heritage Nortel Products located at [http://support.avaya.com/LicenseInfo/](http://support.avaya.com/LicenseInfo/) under the link “Heritage Nortel Products”. For Heritage Nortel Software, Avaya grants Customer a license to use Heritage Nortel Software provided hereunder solely to the extent of the authorized activation or authorized usage level, solely for the purpose specified in the Documentation, and solely as embedded in, for execution on, or (in the event the applicable Documentation permits installation on non-Avaya equipment) for communication with Avaya equipment. Charges for Heritage Nortel Software may be based on extent of activation or use authorized as specified in an order or invoice.

Copyright

Except where expressly stated otherwise, no use should be made of materials on this site, the Documentation, Software, or hardware provided by Avaya. All content on this site, the documentation and the Product provided by Avaya including the selection, arrangement and design of the content is owned either by Avaya or its licensors and is protected by copyright and other intellectual property laws including the sui generis rights relating to the protection of databases. You may not modify, copy, reproduce, republish, upload, post, transmit or distribute in any way any content, in whole or in part, including any code and software unless expressly authorized by Avaya. Unauthorized reproduction, transmission, dissemination, storage, and or use without the express written consent of Avaya can be a criminal, as well as a civil offense under the applicable law.

Virtualization

Each vAppliance will have its own ordering code. Note that each instance of a vAppliance must be separately ordered. If the end user customer or Business Partner would like to install 2 of the same type of vAppliances, then two vAppliances of that type must be ordered.

Each Product has its own ordering code. Note that each instance of a Product must be separately licensed and ordered. “Instance” means one unique copy of the Software. For example, if the end user customer or Business Partner would like to install 2 instances of the same type of Products, then 2 Products of that type must be ordered.

Third-party components

“Third Party Components” mean certain software programs or portions thereof included in the Software that may contain software (including open source software) distributed under third party agreements (“Third Party Components”), which contain terms regarding the rights to use certain portions of the Software (“Third Party Terms”). Information regarding distributed Linux OS source code (for those Products that have distributed Linux OS source code) and identifying the copyright holders of the Third Party Components and the Third Party Terms that apply is available in the Documentation or on Avaya’s website at: [http://support.avaya.com/ThirdPartyLicense/](http://support.avaya.com/ThirdPartyLicense/). You agree to the Third Party Terms for any such Third Party Components.

Preventing Toll Fraud

“Toll Fraud” is the unauthorized use of your telecommunications system by an unauthorized party (for example, a person who is not a corporate employee, agent, subcontractor, or is not working on your company’s behalf). Be aware that there can be a risk of Toll Fraud associated with your system and that, if Toll Fraud occurs, it can result in substantial additional charges for your telecommunications services.

Avaya Toll Fraud intervention

If you suspect that you are being victimized by Toll Fraud and you need technical assistance or support, call Technical Service Center Toll Fraud Intervention Hotline at +1-800-643-2353 for the United States and Canada. For additional support telephone numbers, see the Avaya Support website: [http://www.avaya.com/support](http://www.avaya.com/support).

Suspected security vulnerabilities with Avaya products should be reported to Avaya by sending mail to: [securityalerts@avaya.com](mailto:securityalerts@avaya.com).

Trademarks

Avaya, the Avaya logo, Avaya Aura® System Manager are either registered trademarks or trademarks of Avaya Inc. in the United States of America and/or other jurisdictions.

All non-Avaya trademarks are the property of their respective owners. Linux® is the registered trademark of Linus Torvalds in the U.S. and other countries.

Introduction

This Release Note gives you information about installation downloads and the supported documentation of Avaya Aura® WebLM 6.3.22 on VMware. This Release Note also contains information about known issues, and the possible workarounds in this Release.

You must install WebLM 6.3.22 on WebLM 6.3.2 or 6.3.3 or 6.3.4 or 6.3.5 or 6.3.7 or 6.3.8 or 6.3.10 or 6.3.11 or 6.3.13 or 6.3.14 or 6.3.16 or 6.3.17 or 6.3.18 or 6.3.19 or 6.3.20 or 6.3.21 Release.

Note: For information about installing and upgrading to WebLM 6.3.2 on VMware, contact Avaya Technical Support.

Product support notices

Some product changes are documented as Product Support Notices (PSN). The PSN number defines the related document.

To read a PSN description online:

2. On the main menu, click Support by Product -> Documents.
3. In the Enter Your Product Here field, enter System Manager or select Avaya Aura® System Manager from the list.
4. In the Choose Release field, click 6.3.x.
5. Click Documents.
7. Click Enter.
8. To open a specific PSN, click the PSN title link.
Problems fixed in WebLM 6.3.22

Fixes delivered to WebLM 6.3.22

## WebLM Release 6.3.22 Downloads

<table>
<thead>
<tr>
<th>#</th>
<th>Procedure</th>
<th>Notes</th>
</tr>
</thead>
</table>
| 1. | Download WebLM 6.3.22 bin file from the Avaya PLDS Web site.   | Verify that the md5sum for the downloaded bin matches the number on the Avaya PLDS website.  
**File Name:** WebLM_6.3.22_r5908222.bin  
**PLDS Download ID:** SMGR6322GA2  
**Size:** 637MB  
**MD5SUM:** 94d8d7ed2119255253dea7779c76bb82 |

### Points to remember before installation

1. **Perform VMWare snapshot of the WebLM VM**  
   A snapshot preserves the state and data of a virtual machine at a specific point in time. Snapshots consume large amounts of data resources, increase CPU loads on the host, and affect performance and service.  
   **Note:** Verify that the patch installation or upgrade is successful, and ensure that the virtual application is functional. You can then delete the snapshot.

2. **Log in to the WebLM CLI interface as the ‘admin’ user and perform a Backup as mentioned below:**  
   Backup can be performed in the following two ways –
   - Option 1: Provide the backup location as a parameter.  
     - `WebLMBackup <backup_location>`  
     - In this case the backup of WebLM would be taken at the specified location.
   - Option 2: If a backup location is not given as a parameter.  
     - `WebLMBackup`  
     - In this case the backup of WebLM would be taken at the default location specified in conf.properties.

### Installing the Service Pack

To install WebLM 6.3.22 Release, perform the following actions:

**Note:** Patch install will not work with ASG login’s init/inads and craft user. You must login as admin user to perform patch installation.

1. Log in to the WebLM CLI interface as the ‘admin’ user.
2. Copy the patch installer file to the WebLM server.
3. Verify md5sum of the bin file with the value from PLDS.
4. Execute the Service Pack as follows –
   ```
   #WebLMPatchdeploy
   ```
5. It will ask for the location of the patch file. Provide the correct location of the patch and click Enter.
6. Wait for the system to execute the patch installer and display the installer prompt.
7. Verify the service pack installation from below steps
   - Log into WebLM Web Console.
   - Click the About link on the home/landing page. Verify that About page contains as below:
     ```
     Web License Manager (WebLM v6.3)  
     Build Number - 6.3.22.X.XXXX
     ```
Note: If the patch installation or upgrade is successful and the virtual application is functional, you can delete the snapshot.
8. After you upgrade the system to service pack 6.3.22, reboot the WebLM from CLI to get the updated kernel running in memory.

Technical support

Avaya Technical Support provides support for WebLM 6.3.22 on VMware.

For any problems with WebLM 6.3.22 on VMware, you can:

1. Retry the action. Carefully follow the instructions in the printed or online documentation.
2. See the documentation that is shipped with your hardware for maintenance or hardware-related problems.
3. Note the sequence of events that led to the problem and the messages that the system displays. See the troubleshooting section of the Avaya product documentation.

If you continue to have problems, contact Avaya Technical Support by logging in to the Avaya Support website at http://support.avaya.com.

Before contacting Avaya Technical Support, keep the following information handy:

- Problem description.
- Detailed steps to reproduce the problem, if any.
- The release version in which the issue occurs.

Note: To know the release version and build number, log in to WebLM and click About on the user interface. If WebLM Console is inaccessible, you can log in to WebLM SSH interface and run the swversion command to get the WebLM version.

- The status of the WebLM software. If the software is an upgrade, then the release from which the software is upgraded.
- Installation log files are available at /opt/Avaya/install_logs
- The WebLM Tomcat server log files are available at $CATALINA_HOME/logs. You can gain access to the CLI using admin as the user name and gain access to the log file.
- Additional WebLM logs at $CATALINA_HOME/webapps/WebLM/data/log.

You might be asked to send by email one or more files to Avaya Technical Support for analysis of your application and the environment.

For information about patches and product updates, see the Avaya Support website at http://support.avaya.com
