Browser Alternative - Adobe Flash Player End of Life

Date: December 1, 2020

Pale Moon has announced their browser will continue support for the Adobe Flash Player.

Avaya customers may change their browser software to the Pale Moon browser (https://www.palemoon.org/) as an alternative.

This browser should be loaded with Adobe Flash Player prior to December 30, 2020. Once the Player is loaded onto the user’s Pale Moon browser this system should be used to run reports for CA or IQ. Make sure to access any program UI from all desktops / laptops with Pale Moon Browser configured with Adobe Flash Player before Adobe stops downloads of Flash Player.
