Talkpath issue for TN2602AP IP Media Resource 320

Advisory Original Release Date: November 30, 2005
Last Revised: April 11, 2006
Number: ASA-2005-231
Risk Level: Medium
Advisory Version: 2.0

Advisory Status: Final

Overview:

The TN2602AP IP Media Resource 320 circuit pack provides high-capacity Voice over Internet (VoIP) protocol audio access to the switch for local stations and outside trunks.

A flaw was discovered in the Avaya TN2602AP IP Media Resource 320 prior to vintage 9 firmware. This flaw could allow a remote attacker to cause a denial of service (memory leak) via specially crafted packets. Although Avaya is not aware of active attacks that exploit this flaw, customers are recommended to upgrade to vintage 9 firmware (or later) to resolve this issue. The common vulnerabilities and exposures project (cve.mitre.org) has assigned the name CVE-2005-3989 to this issue.
